Chelsea and I worked on numerous projects. In her role as a production/jr. designer, she worked on extending the design and creating production assets for development.

I can't say enough about Chelsea's great work attitude, attention to detail, talent and excellent communication skills. She is always my GO-TO person when it comes to production design and design extensions, because I can count on her putting a lot of thought into everything that she does and coming back with a question or suggestions where/when needed. Chelsea can think strategically and outside the box. Her technical background gives her an advantage amongst creative folks.

I would hire or work with Chelsea anytime. She's truly an asset to any organization.
